

Thermograph 1

Thermograph 1 is the initial infrared thermograph taken of both front feet of a racehorse in training. The thermograph depicts large areas of increased thermal gradients throughout the tissues.

Thermograph 2 was taken after three applications of Magic Cushion 24 hours apart during a normal training regimen. Results indicate a 70% reduction of the thermal gradients within the tissues.

HOOF PACKING

PURE
VENETIAN
TURPENTINE

An ULTRA-PURE formulation!

...is an anti-inflammatory and analgesic hoof packing for the reduction of concussion, pain and trauma within the hoof of the equine athlete.

This scientifically proven hoof packing has proved efficacious in providing relief from laminitis, white line disease, pedal osteitis, abscesses, navicular syndrome, bruising, corns, canker and any concussive trauma to the hoof tissues.

Magic Cushion can be used under a protective pad or simply apply it with or without a simple wrap. Ideally, it is formulated for use after a hard work or the day before and the day of the athletic event.

Magic Cushion is a natural product and is not a cause for concern during any drug testing.

TO APPLY MAGIC CUSHION FOLLOW THESE FOUR EASY STEPS:

1. Thoroughly clean all areas of the sole using a hoof pick and a wire brush if necessary. Magic Cushion must come in direct contact with the sole to be effective.
2. Using gloves or an applicator, apply an amount of hoof packing to the sole that is sufficient to cover the entire sole and sulci of the frog 1/2 inch in depth.
3. A U.S. quarter is 1 inch in diameter and can be used as an easy measuring device to determine the amount of Magic Cushion to use.

4. When the application is complete, wrap the foot to keep the hoof packing in place and allow the liquid ingredients to be absorbed into the sole.

...is an extremely pure form of Venetian Turpentine that is made from imported Larch tree rosin. There are no dilutents present in its formulation and therefore freezing and crystallizing in cold temperatures is not a problem.

The medicinal effects of Venetian Turpentine have been proven throughout the ages and this ultra-pure formulation is supremely effective.
